

HIGH PERFORMANCE+ PANEL 1200X300 IP44 3500LM 25W 4000K NON-DIMM 140LM/W BACKLIT

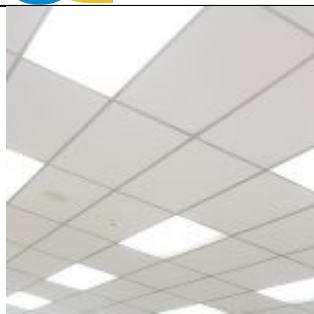

Description

This 25W and 3500lm Integral LED Performance+ panel delivers a uniform white light across the whole of its surface. Its very high level of efficacy (140lm/W) offers savings in running cost against traditional 72W fluorescent fitting as well as many other LED panel.

The panel is fitted with a polycarbonate diffuser that has been tested by a UK based laboratory and passes BS782-0:2004 Method 508A, as required by Fire Safety regulations.

Its lightweight steel and PC design means installation is simple and maintenance is minimal. It is an ideal solution for many applications: offices, meeting rooms, corridors, airports, schools/universities and retails environments.
