

HIGH PERFORMANCE+ PANEL 1200X600 IP44 6900LM 46W 4000K NON-DIMM 150LM/W BACKLIT

Description

This 46W and 6900lm Integral LED High Performance+ panel with integrated emergency function delivers a uniform Cool white light across the whole of its surface. Its very high level of efficacy (150lm/W) offers savings in running cost against traditional 144W fluorescent fitting as well as many other LED panel.

Its lightweight steel, integrated emergency pack and polycarbonate diffuser means installation is simple and maintenance is minimal. With charge indicator and self-test button positioned on the front of the panel it can then be viewed from all angles so continued function can be quickly confirmed. Once installed correctly in the event of mains power failure the panel will continue emitting light (150 lumen output) for a minimum of 3 hours.

All Integral LED emergency panels comply with BS EN 60598-2-22 and comply with designs that require compliance with BS EN 50172:2004.
